## ***MATERIAL SAFETY DATA SHEET (MSDS) INFORMATION***

---

Hadrian Manufacturing Inc.'s metal toilet partitions and lockers are not manufactured using asbestos or any hazardous materials. This includes all of the components of metal, honeycomb, aluminum, glue, and the organic, polymer powder coated finish.

The Occupational Safety and Health Administration (OSHA) Hazard Communication Final Rule states in section 1910.1200 (b) (6) that the Rule does not apply to "Articles". The term article is defined in section 1910.1200 (c) as a "manufactured item (i) which is formed to a specific shape or design during manufacture: (ii) which has end use functions dependent in whole or in part upon its shape or design during end use, and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions or use".

All of Hadrian's metal toilet partitions and lockers would be deemed to be "Articles" as described in the OSHA Final Rule. Accordingly, there is no requirement to furnish Material Safety Data Sheets.
