

MATERIAL SAFETY DATA SHEET (MSDS) INFORMATION

The Occupational Safety and Health Administration (OSHA) Hazard Communication Final Rule states in section 1910.1200 (b)(6)(v) that the rule does not apply to "Articles". The term "article" is defined in section 1910.1200 (c) as "a manufactured item...(i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical...and does not pose a physical hazard or health risk..."

Hadrian Manufacturing Inc.'s products do not release hazardous chemicals and do not pose a physical hazard or health risk. All of Hadrian's toilet partitions and lockers would be deemed to be "Articles" as described in the OSHA Final Rule. Accordingly, there is no requirement to furnish Material Safety Data Sheets.
