

Indicator Latch for Restroom Partitions

Stylish, Elegant and Guest Friendly

Little things can make a big difference. Build a great guest experience into your restroom design with Hadrian's rectangular indicator latch. The unique shape has a larger surface viewing area than most latches, making it easy for guests to identify compartment availability.

The latch's sleek design complements the vertical flow of the partitions and allows doors to reset to a fully closed position, providing a uniform, neat appearance when not in use. The larger indicator area also helps keep the traffic in busy restrooms moving because guests won't be confused where to go or have to knock on doors to check if a compartment is available.

This attractive latch comes standard on phenolic partitions as well as powder coated and stainless steel Elite, Elite Plus and Elite Max partitions.

The Hadrian® Difference

Larger Indicator Area

Easy-to-read red / green indicator is over 150% larger than most indicators on the market.

Unique Rectangular Shape

Elegant latch design complements partition door shape.

Emergency Access Feature

A pin or Allen wrench inserted into side opening gives access to compartment in seconds.

Tamper-Resistant Screws

Latch fasteners are TR-27 6-lobe security screws to deter vandalism.

#4 Brushed

Available on
Phenolic Partitions
Powder Coated Partitions
Stainless Steel Partitions

Matte Black

Available on
Phenolic Partitions

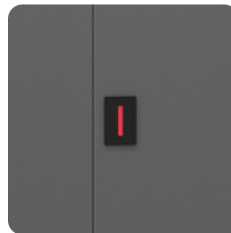

Indicator latch is only available for Hadrian partitions that eliminate sightline gaps around the doors. Latches are made of zamac and are designed specifically for either phenolic or metal partitions, making them non-interchangeable.
